MOREnet

Who We Are

Organized as a membership consortium in 1991, the Missouri Research and Education Network (MOREnet) MOREnet operates as a department within the University of Missouri System.

In addition to managing and maintaining a robust and secure fiber network infrastructure, MOREnet provides its members with technical services including cybersecurity, network consulting, technical support, videoconferencing, training, and hosted and managed applications, as well as access to a number of online resources. As a non-profit technology partner with over 30 years of regional networking and information technology experience, MOREnet ensures consistent quality and cost-effective solutions for member organizations throughout the state.
