

Helping you navigate the Changes in Microsoft Licensing

Microsoft 365 Education includes Office 365, Windows 10, Enterprise Mobility + Security, and Minecraft: Education Edition to empower educators to unlock creativity, promote teamwork, and provide a simple and safe experience in a single, affordable solution built for education.

Microsoft now has two Education Service Plans, A3 and A5.

If you have a current agreement, we will need your agreement number before we can take any next steps. In addition, Microsoft now requires counts on the following criteria:

Windows 10

EQU (Education Qualified User)

An employee or contractor (except Students) who accesses or uses an Education Platform Product for the benefit of the Institution.

Full Time Faculty/Staff Member
Part Time Faculty/Staff Member
Adjunct/Substitute Teacher
Librarian
Public Safety

These users will have a full version of Microsoft 365

Light User

Windows may be installed on shared devices, such as kiosks or lecture hall computers, for use by infrequent users

Bus Driver
Custodian
Cafeteria Worker
Facilities Maintenance

These users will only have Office 365

Student Counts

These users are similar to light users and will only have Office 365

OVS-ES is still available for those districts that want the bare minimum from Microsoft. You will still be asked to provide the EQU, Light User, Student Count OR total number of devices.

An OVS-ES agreement will not allow you access to Minecraft for Education. If you're interested in that service, you need an M365. There is not an add on available.
