

## Wireless Services for MOREnet Members

### In the Building

- Installation- consortium discount negotiated with InfiniTech
- Predictive Wireless Survey- remote suggestions on access point placement and configuration; most effective when followed by a wireless assessment
- Wireless Assessment Survey- onsite evaluation for new or existing wireless infrastructure: troubleshooting disconnects, weak signals, frequencies and rogue access points
- Management by MOREnet- monitor, trouble shoot, manage access points and report usage
- Management by member- with heavily discounted high-end quality monitoring products from Aerohive
- Technical support/ help line \*\*

### In the Classroom

- Internet Content Filtering (ICF)- Two options: Netsweeper and iboss; beneficial in both the classroom and when devices leave the network
- Mobility Management with Airwatch by VMWare- manage usage and access from one central console
- Training- hands-on device labs for evaluation, workshops for teachers on best practices for using devices \*\*

### Extending the Connection

- Peer to Peer Collaboration through MOREnet Annual Conference
- Regional meetings, security roadshow and other networking opportunities \*\*
- Webinars available both live and hosted on-demand for specific topics \*\*

*\*\*Included with MOREnet membership fee,  
Some restrictions apply.*
